MAKING THE FUTURE

People well-being and life quality are related to different life aspects. The way we see and the way we feel about ourselves, our disposition to wake up every morning and pursue our objectives are affected by the environment and the people around us. The most useful technologies and innovations have a purpose, the purpose of helping people to feel better, live better and enjoy their lives. Nanovetores technology was created considering this as the very first guideline and that's what our Group seek in each branch.

NANO
VETORES®
GROUP

NANOVETORES GROUP

OUR HISTORY

Nanovetores has built a successful history since 2008. We have won several Prizes and Awards that highlight the innovative differential and the versatility of our technology.

This, combined with the creative potential of our team, provided the expansion in the cosmetic and other industrial segments.

INTERNATIONAL PRESENCE

Nanovetores is globally present, the solution created fits perfectly the global cosmetic industry. The high efficacy and the safety of the active ingredients enables new possibilities

to brands who are interested in innovating and delivering the best results to their customers. We have distributors over 26 countries, contact us for more information.

HIGH PERFORMANCE ENCAPSULATED ACTIVE INGREDIENTS

Nanovetores Group is an innovative company established in Brazil known for the development of nano and microencapsulated active ingredients. We maximize the performance of active ingredients granting protection, deeper permeation and control over the release of the active compound.

Our company is committed to sustainability, all our products are designed and produced in clean and green processes. The products are manufactured using only water as solvent, the process is totally free of organic solvents, which grants safety for the environment and final users.

Our Research, Development and Innovation team counts with renowned professionals with more than 15 years of international experience and expertise in active ingredients encapsulation systems. In addition, our company sectors works synergically to provide the most appropriate solutions for each need in a fast and proactive way.

TECHNOLOGY & SUSTAINABILITY

PROLONGED RELEASE THROUGH SPECIFIC TRIGGERS

Our technology allows a prolonged release of the active ingredients through 5 innovative and specific triggers.

Water

The addition of water sets-off the release of the actives from the capsules. Example: Our Instant Base has a self-emulsifying action. When water is added, it forms a bright and smooth homogeneous cream.

Temperature

A heat source promotes the variation of the capsule's temperature, releasing the active ingredient. Example: Hair dryers or Straightening Irons.

Enzymatic

The Enzymes promote the breakage of the capsules, releasing the active in the deeper layers of the skin through time, this trigger enables controlled and sustained release of the active ingredients, granting superior benefits and no irritability.

pH Variation

The pH variation leads to the disruption of the capsules, releasing the active ingredients. For example, sweating promotes a skin pH variation, this change will release the actives.

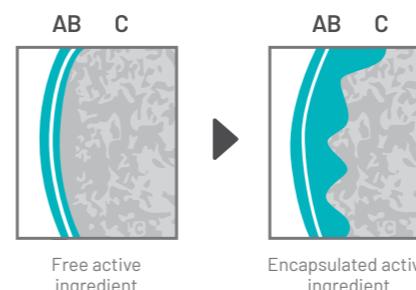

Friction

The friction on the capsules promotes their breakage and the active's release. We have developed encapsulated fragrances that after friction, releases a stronger scent. The biocompatible composition of these capsules make them safe for application in personal care.

PERFORMANCE & SAFETY

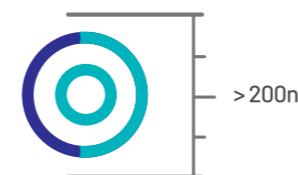

INCREASED PERMEATION

The encapsulation grants a better permeation of the actives in the skin. Unlike the actives in their free form, the encapsulated actives can overcome the stratum corneum layer, reaching the epidermis and delivering the maximum benefits.

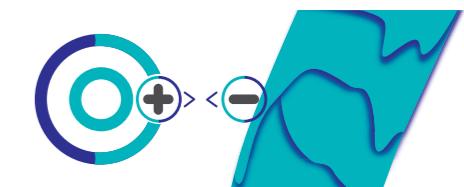

SAFE PARTICLES

We work with labile particles, biocompatible and biodegradable, bigger than 200nm (nanometer), which does not generate risks to users or the environment.

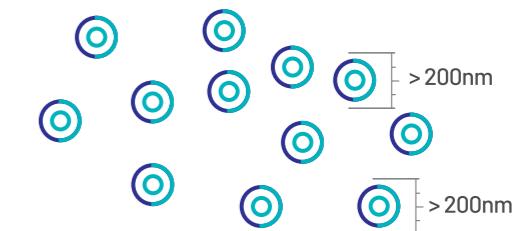

SURFACE CHARGE CONTROL

The control over the capsules surface charge promotes a better fixation of the capsules when in contact with the surface. Example: In active ingredients for hair products, the capsules have a positive surface charge, that will be attracted by the hair's natural negative charge.

MONODISPERSEY

We perform the control over the size of the particles, granting the uniformity of the active ingredients' capsule size and ensuring that all of them have the proper permeation for each specific benefit.

MULTIFUNCTIONAL PARTICLES

The main function of the capsules is to protect the active ingredients and increase its permeation. But Nanovetores' capsules are multifunctional, they work synergically with the encapsulated ingredients to enhance the benefits of its usage. There are two kind of capsules:

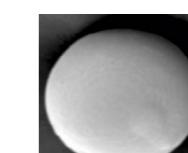

Lipid particle, Multifunctionality:
Moisturizing and Enhanced Permeation

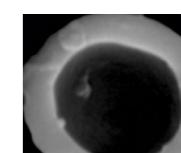

Biopolymer particle, Multifunctionality:
Cutaneous Firmness and Hair Adhesion.

MORPHOLOGICAL CONTROL

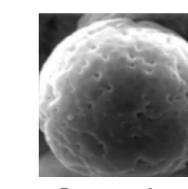

We develop different types of particles for different applications.

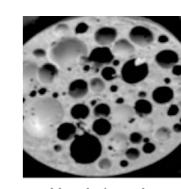

Occlusive surface

Vesicular Interior

Porous surface

Matrix Interior

**BEAUTY
COMES FROM
INSIDE**

IN Beauty uses the technology created to develop high performance and safe active ingredients for cosmetic applications. People confidence, self-esteem and health are affected by how they feel about their look, and cosmetics can help people get the best version of their selves. Nanovetores technology grants new possibilities to the cosmetic industry, delivering results with safety and sustainability.

INBeauty
NANOVETORES

ACTIVE INGREDIENTS

Our active ingredients are developed considering synergic combinations of ingredients. These combinations grant that brands who chooses the innovation path will deliver superior benefits to people. The capsules are based on natural materials that are biocompatible and biodegradable, totally safe for humans and nature.

NANO CAVIAR

Benefits: Performing as a powerful rejuvenator, it acts promoting nutrition, antioxidant, regenerative and anti-wrinkle action. Nano Caviar has a perfect balance between its components, which fully satisfies the skin's needs.

Actives: Caviar Extract, D-Panthenol and Hyaluronic Acid.

NANO EYELASHES

Benefits: Assists to reduce the loss of eyebrows and eyelashes, promoting strengthening and growth of new eyebrows and eyelashes.

Actives: Jojoba extract.

NANO HYALURONIC ACID

Benefits: Nano Hyaluronic Acid has wrinkle filling and moisturizing action, it also enhances the skin's elasticity.

Actives: Hyaluronic Acid.

NANO JAMBU

Benefits: Brazilian herb which contains spilanthol among its actives, that generates a local paresthesia effect (senseless effect) and undergo skin's cells micro tensions, made by time and repeated movements, therefore combating aging signs. Also contains anti-oxidant properties.

Actives: Concentrated Jambu Extract.

NANO KOJIC ACID

Benefits: Whitening and antiaging action. Indicated for the treatment of skin hyperchromias.

Actives: Kojic Acid.

NANO LUMINOUS EYES

Benefits: Indicated for the treatment of dark circles, bags and sagging around the eyes. Antioxidant, soothing and anti-inflammatory action. Promotes depigmentation and clears the blood vessels.

Actives: Essential oils of mandarin, sage and palmarosa.

NANO OIL CONTROL

Benefits: Blend of actives rich in phenolic acids, powerful refreshing substances and regulators of oiliness with astringent action.

Actives: Essential oil of rosemary, sage, mint, pumpkin and chamomile seed oils and d-panthenol.

NANO SALICYLIC ACID

Benefits: Nano Salicylic Acid is the ideal active ingredient for acne treatment due to its keratolytic and comedolytic effects. It is an agent for superficial peeling and as it is encapsulated, it is totally safe for all skin types.

Actives: Salicylic Acid.

NANO UP LIFT

*Highlighted product at In-cosmetics Brazil 2014

Benefits: Versatile and multifunctional active developed with hyaluronic acid nanoparticles that promotes skin tightening and wrinkle filling effect. It also increases skin firmness and elasticity by stimulating collagen production.

Actives: Hyaluronic Acid and Senegal Acacia.

NANOVETOR DMAE

Benefits: Tightening effect with firming action, anti-wrinkle, antioxidant, moisturizer and anti-aging action.

Actives: Dimethylaminoethanol bitartrate.

NANOVETOR MELALEUCA

Benefits: Ideal for anti-acne products. Potent antimicrobial (fungi, yeasts, gram negative bacteria and herpes simplex virus).

Actives: Tea Tree Essential Oil.

NANOVETOR Q-10

Benefits: Endogenous antioxidant cellular, prevents photoaging and promotes the decrease of wrinkle's depth.

Actives: Coenzyme Q-10.

NANOVETOR RESVERATROL

Benefits: Provides prevention and treatment for skin, acting in photoaging. Possess antioxidant and radioprotective effect. Improves skin elasticity and stimulates collagen synthesis.

Actives: Trans-Resveratrol and pomegranate oil.

NANOVETOR VITAMINA A

Benefits: Stimulates collagen synthesis, slows aging and reduces fine wrinkles. Keeps the skin smooth and soft.

Actives: Retinyl Palmitate.

NANOVETOR VITAMINA C

Benefits: Whitening effect (uniforms skin tone), firming (stimulates collagen synthesis), antioxidant, reduces wrinkles and expression lines.

Actives: Ascorbyl Palmitate and pomegranate oil.

NV ALPHA ARBUTIN

Benefits: Powerful depigmenting agent. Acts on melanogenesis, blocking epidermal biosynthesis of melanin in the applied place, safely treating spots, melasmas and freckles.

Actives: Alpha-arbutin.

NV ETERNITY

Benefits: Potent anti-aging and rejuvenator that inhibits the production of collagenase, the enzyme that destroys collagen, the main structural protein responsible for skin's elasticity and strength. Also, its actives have moisturizing and skin tone correction, along with skin cell renewal properties, granting a complete skin care treatment.

Actives: Frankincense and Palmarosa Essential Oils.

NV GLYCOLIC ACID

Benefits: Stimulates cell renewal, reduces fine wrinkles, makes the skin softer, firmer and rejuvenated. Excellent for treating acne, actinic keratoses, age spots, dry skin and variants.

Actives: Glycolic Acid.

NV RETINOL

Benefits: Encapsulated Retinol has high stability, controlled permeation, and sustained release. This active ingredient acts on the synthesis of collagen and elastin, promoting the epidermal renewal and reducing the fine wrinkles and signs of aging, leaving the skin with a younger and healthier look.

Actives: Retinol.

NV TRANEXAMIC ACID

Benefits: Powerful whitening action. Recommended for Melasma treatment and for the prevention of UV-induced skin pigmentation.

Actives: Tranexamic Acid.

SYMBIOCAPS LA

Benefits: Benefic bacteria that harmonizes the skin microbiota, which results in pore minimization, moisturizing properties, skin pH balancing, acne and rosacea treatment, cells' metabolism restoration and immunity improvement for a complete and healthy beauty skin treatment.

Actives: Lactobacillus Acidophilus.

NANO 3C

Benefits: Acts in the treatment and prevention of cellulite. Anti-inflammatory, antioxidant and thermogenic action. Speeds up the metabolism promoting fat burning and body measures reduction.

Actives: Safflower oil, coconut and clove.

NANO BODY LIFT

Benefits: Firming, refreshing, moisturizing and antioxidant action. Promotes lifting effect with toning action.

Actives: Essential oils of mint, piperita and palmarosa, green tea oil, coconut extract and soy protein.

NANO CELLULITECH

Benefits: Acts burning located fat, reducing the orange peel aspect. It acts in the treatment of gynoid lipodystrophy and reduction of measures, providing draining action, anti-inflammatory, anti-free radicals, reducing lipogenesis and increasing lipolysis. It also improves the local microcirculation.

Actives: Caffeine, green tea oil, arnica montana oil and essential oil of palmarosa.

NANO FUNGI

Benefits: Natural Antifungal that acts against fungi and yeasts. Proven efficacy against Candida albicans and Aspergillus fumigatus.

Actives: Essential oils of clove, cinnamon, lavender and melaleuca.

NANO LADIES

Benefits: Breasts firming action, stimulates collagen synthesis, possess estrogen-like action, stimulating the breast circumference increase.

Actives: Foeniculum Vulgare oil.

NANO NAILS

*Product winner of the Innovation Stemmer's Award 2011.

Benefits: Fast effect in repairing dry, weak and brittle nails. Presents antimicrobial and moisturizing properties. Powerful strengthening and beautifying effect on nails and cuticles

Actives: Essential oils of lemongrass, melaleuca and cloves.

NANO RELIEF

Benefits: It acts in the immediate relief of muscle, arthritis and rheumatism pain. It promotes the regeneration of the skin and strengthens the tissues, improving the blood microcirculation, toning the treated region in a wide way.

Actives: Vetiver and Sweet Birch essential oils.

NANO ROSE HIPS

Benefits: Ideal product for skin renewal, stimulates the regeneration of cutaneous tissues, helping to prevent and mitigate premature skin aging and stretch marks. Helps with skin regeneration of post-surgical scars, and also heals skin burns.

Actives: Rose Hips Oil.

NANO SKIN HEALER

Benefits: Acts as a regenerator of damaged skin, it has anti-inflammatory action and helps to minimize the appearance of scars.

Actives: Aloe Vera, Chamomile and Onion Extract.

NANO SKIN THERAPY

Benefits: Perfect for the recovery of injury skins. Can be applied in post peeling products, stimulating the skin healing. It also can be used as an auxiliary treatment for psoriasis, eliminating the erythematous and squamous lesions that are characteristic of this condition.

Actives: Curcumin, Aloe Vera and Rose Hips Oils.

NANOICARIDINA

Benefits: Safe and powerful repellent that has its action improved by Nanovetores Encapsulation System, that extends protection time and potentializes its effect. Safe repellent for every group, including children older than 6 months and pregnant women. It has great efficiency against the Aedes aegypt, mosquito that transmits the viruses of Dengue, Zika and Chikungunya.

Actives: Icaridina.

NV DELICATE SKIN

Benefits: Developed for sensitive skin, promotes intense moisturization and cell regeneration, improving skin elasticity. Potent antioxidant and anti-inflammatory action.

Actives: Coconut, linseed, chamomile and oat essential oils.

NV HYDRATECH

Benefits: Indicated for the treatment of dry, thin and sensitive skins, NV Hydratech has the property of keeping skin naturally hydrated.

Actives: Ammonium Lactate and Oat Oil.

cruelty-free vegan

NANO CARIBBEAN OIL

Benefits: Indicated for damaged, dry and brittle hair, promotes extreme repair, hair restructuring, shine recovery, vitality, strength and protection.

Actives: Batana Oil.

NANO CAVIAR

Benefits: Indicated for the treatment of chemically damaged hair. The regenerative power of Nano Caviar promotes the increase of the capillary mass while hydrates and grants intense glow, vitality and softness to hair strands. The capsules technology allows the active to bind easily to the hair, reducing its porosity and strengthening the strands from the root to the tips, providing greater vitality, protection and shine.

Actives: Caviar Extract, D-Panthenol and Hyaluronic Acid.

NANO FRESH

Benefits: Refreshing action.

Actives: Menthol and Menthol Lactate.

NANO HYALURONIC ACID

Benefits: Nano Hyaluronic Acid can be incorporated into formulations for chemically treated hair, where it acts reducing the porosity, making the hair strands brighter, hydrated and improving their elasticity.

Actives: Hyaluronic Acid.

NANO LISS

Benefits: Anti-aging for hair with shielding action that increases the hair mass. Promotes disciplining effect on the hair, color protection and hair modeling.

Actives: Onion extract, urea and glycerin.

NANO OIL CONTROL

Benefits: Blend rich in oiliness natural regulators. Nano Oil Control delivers oiliness control without drying the scalp. Assists in the treatment of dandruff and hair loss.

Actives: Essential oil of rosemary, sage, mint, pumpkin and chamomile seed oils and panthenol.

NANO REPAIR

Benefits: High performance active responsible for ultra hydration for dry hair and for reducing the damage caused by chemical treatments.

Actives: Lanolin, essential oil of lavender, rosemary and palmarosa.

NANO REVIVAL

Benefits: Blend with revitalizing action. Forms a protective film that restores and preserves the color and brightness, promoting the healthy growth of the hair.

Actives: Sunflower oil, avocado oil, green tea extract, keratin.

NANO T-GROWTH HAIR

Benefits: Balances the oiliness of the scalp and improves microcirculation reinvigorating the hair follicle and reactivating hair growth. Nourishes the root and strengthens the hair.

Actives: Extracts of licorice, ginseng, black cumin, black pepper, burdock, B vitamins and amino acids.

FRAGRANCES

NANO SENSATIONS

Appearance: Milky liquid.

Description: Encapsulation system for fragrances, essences, essential oils or flavorings. The capsules are biocompatible and biodegradable, micro sized, activated by the friction trigger. The encapsulation of scents provides increased durability of the perfume and the release of sensations to cosmetic applications.

COMPLETE SOLUTIONS

We have a portfolio of ready-to-pack products that combines versatile and pleasant bases developed here to fit perfectly with our active ingredients. We are able to offer complete solutions to brands and customers with quality and agility, acting as a partner with the highest R&D and Quality Control standards.

INSTANT BODY BASE

Appearance: Yellow to amber, slightly viscous and cloudy liquid.
Description: Anhydrous balanced formula that forms an emulsion once in contact with water, increasing the temperature during the mixing, resulting in a moisturizing body cream. High permeation, playful effect and usage versatility (massage during bath).

Available Actives + Instant Hair Bases: Instant 3C / Instant Relief / Instant Rose Hips / Instant Cellulitech / Instant Slim.

INSTANT HAIR BASE

Appearance: Yellow to amber, slightly viscous and cloudy liquid.
Description: Playful and versatile product. It forms an emulsion once in contact with water, with temperature increase during the mixture, resulting in a conditioner with high capillary affinity. Concentrated product developed in the do-it-yourself concept.

Available Actives + Instant Hair Base: Instant Blond / Instant Caribbean Oil / Instant Glossy / Instant Repair / Instant Revival / Instant Smooth.

MASK HAIR BASE

Appearance: Viscous Cream.
Description: Hair base with pleasant sensorial, suitable for application in hair masks for weekly treatment. Provides high moisture and conditioning.

NANO PEEL OFF

Appearance: Viscous and crystalline gel.
Description: It is characterized by forming a thin, flexible film with quick drying that promotes a strong tensor effect. Suitable for all skin types, removes the dead cells and can be combined with Nanovetores Actives to grant a great variety of benefits.
Available Active + Peel Off Base: Nano Caviar / Nano Hyaluronic Acid / Nano Up Lift / Nanovetor DMAE / Nanovetor Melaleuca.

NANOSTRUCTURED ULTRA FLUID BASE

Appearance: Milky liquid.
Description: Fluid base with great spreadability and pleasant sensorial. Allows emulsified formulations in spray format. Ideal for body applications, in which the usability of the base is a differential of the product.

PRODUCTS LINE

 cruelty-free 

CELLULITECH LOTION

Appearance: Low-viscosity product with white color.
Description: Highly effective anti-cellulites lotion. Acts with powerful anti-inflammatory action, granting better skin aspect since the very first application and also as a long-term treatment for the cellulites.

NANO AGELESS COMPLEX

Appearance: Medium-viscosity product with beige color.
Description: Product for the eye area that instantly smooths wrinkles, expression lines and under-eye bags, providing a more youthful appearance. While it promotes an immediate and temporary action, Nano Ageless Complex delivers long-term benefits due to the presence of high performance antiaging active ingredients in its formula.

NANO NAILS IN LIQUID BASE

Appearance: Low-viscosity product with white color.
Description: Award winning formulation. Enhances the nail structure, granting stronger and healthier nails. Moisturizes the cuticles and grants nail beauty and resistance.

UP LIFT + DMAE CREAM

Appearance: Medium-viscosity product with white color.
Description: Product developed for intensive wrinkle treatment. Clinical testing showed neck wrinkle softening after only 7 days of usage. The encapsulated ingredients (Nano Up Lift and Nanovetor DMAE) acts synergically on the wrinkle treatment, granting visible results in a fast and safe way.

VITAMINA C CREAM

Appearance: Medium-viscosity product with white color.
Description: Face care product with superior antioxidant properties. The encapsulated vitamin C does not oxidize, and therefore, deliver its properties with maximum efficacy. The formulated cream has pleasant application and ensures the skin hydration.

ACTIVES IN PEARLS

Active IN Pearls is a sophisticated and innovative way of delivering high performance ingredients in cosmetic applications.

Consisting of natural biopolymers, pearls have anti-pollution and moisturizing action, as they act by forming a protective film on the skin, preventing trans epidermal water loss and protecting it from contact with air pollution.

Active IN Pearls are oil free and ecofriendly, composed of natural materials and free from parabens, petrolatum, silicones, mineral oil and sulphates, organic solvents, gluten, lactose. It combines elegance and efficacy, grants a pleasant sensorial experience and high-performance natural beauty treatment.

 cruelty-free  vegan

IN PEARLS CAVIAR

Performs as a powerful rejuvenator, Caviar Extract, D-Panthenol and Hyaluronic Acid act promoting nutrition, antioxidant, regenerative and anti-wrinkle action. IN Pearl Caviar has a perfect balance between its components, which fully satisfies the skin's needs.

IN PEARLS ETERNITY C

Made from Frankincense and Palmarosa's Essential Oils with Vitamin C, it is a potent anti-aging and rejuvenator that inhibits the production of collagenase, the enzyme that destroys collagen, the main structural protein responsible for skin's elasticity and strength. Also, its actives have moisturizing and skin tone correction action that are boosted by Nanovetores' encapsulation system that grants enhanced benefits and permeation.

IN PEARLS RESVERATROL

With encapsulated Trans-Resveratrol as the active ingredient, provides photoaging prevention and treatment, with antioxidant and whitening action. Also protects from blue-light.

IN PEARLS RETINOL

Stimulates the synthesis of collagen and elastin, that promotes the epidermal renewal and reduces the fine wrinkles and signs of aging, resulting in skin with a younger and healthier look.

IN PEARLS SYMBIOCAPS LA

Contains encapsulated probiotics, that harmonizes the skin microbiota, which results in pore minimization, moisturizing properties, skin pH balancing, acne and rosacea treatment, cells' metabolism restoration and immunity improvement for a complete and healthy beauty skin treatment. This product grants a better skin health that enhances natural beauty.

IN PEARLS VITAMINA C

Promotes the synthesis of collagen, that has firming action on the skin. Also, has whitening, antioxidant, anti-aging and moisturizing properties.
