

NANOVETORES

Givaudan | NANOVETORES

HIGH PERFORMANCE ACTIVE INGREDIENTS

Nanovetores is an innovative company established in Brazil known for the development of nano and microencapsulated active ingredients. We maximize the performance of active ingredients guaranteeing protection, higher permeation and control over the release of the active compound.

Our company is committed to sustainability: all our products are designed and produced through clean and green processes. They are manufactured using only water as solvent in a process completely free from organic solvents, which guarantees safety for the environment and the end users.

Our Innovation, Development and Research team includes renowned professionals with more than 15 years of international experience and expertise in active ingredients encapsulating systems. Besides that, the different sectors of our company are integrated to provide the most adequate solution for each need in the most agile and proactive way possible.

NANOVETORES

OUR HISTORY

Nanovetores has built its success history since 2008. We have won various awards highlighting the innovative edge and the versatility of our technology.

This, coupled with the creative potential of our team, has facilitated expansion into the cosmetic and other industrial segments.

INTERNATIONAL PRESENCE

Nanovetores has a global presence. Our solution fits perfectly within the global cosmetics industry. The high efficacy and safety of our encapsulated actives enable new possibilities for brands interested in innovation and in delivering the best

results to their clients. We are present in over 150 countries. [Contact us for more information.](#)

TECHNOLOGY AND SUSTAINABILITY

Water Based

Our manufacturing process is based on Green Chemistry, being water based and organic solvents free, completely sustainable. We do not generate residues that might be harmful to the users or the environment.

Active Protection

Essential Oils, Vitamins, Acids and Natural Extracts are highly oxidizing substances which degrade rapidly and constantly react with the medium and other cosmetic compounds (light, oxygen, packages, preservatives, fragrances, surfactants, etc.). By encapsulating them, we guarantee stability to the active ingredients and protect them from potential reactions with both formulation and the environment.

Efficacy

PROLONGED LIBERATION THROUGH SPECIFIC TRIGGERS

Our technology provides prolonged liberation of the active compounds through 5 innovative and specific triggers.

Water

The addition of water sets off the liberation of the nanoencapsulated actives. Example: Our Instant Foundation possess a self-emulsifying action. When water is added, it creates a homogeneous, glowing and smooth cream.

Temperature

A heat source promotes the capsule temperature variation, releasing the active ingredient. Example: hairdryers or hair straightener.

Enzymatic

Enzymes promotes nanoparticles rupture, releasing the active in the deeper layers of the skin throughout time. This trigger enables the controlled and sustainable liberation of the actives, guaranteeing superior benefits without rash.

pH Variation

pH variation results in capsule burst, liberating the active ingredients. For instance, transpiration promotes skin pH variation, this change liberates the actives ingredients.

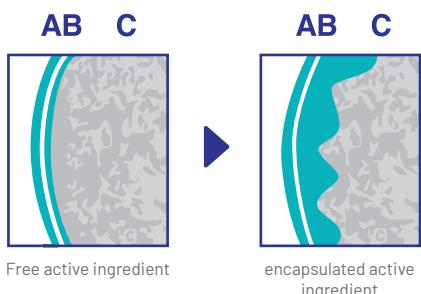

Friction

Capsule friction ends up breaking it and releasing the active. We developed encapsulated fragrances that, after friction, release a stronger aroma. The biocompatible composition of these capsules turn them safe for self-care application.

PERFORMANCE & SECURITY

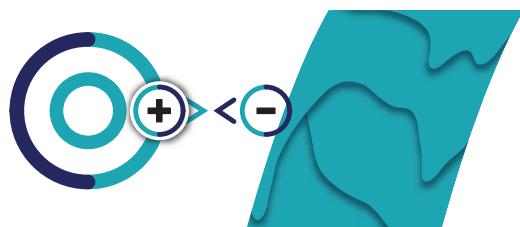

HIGHER PERMEATION

Encapsulation guarantees higher permeation of the actives into the skin. Unlike actives in their free form, encapsulated actives can overcome the stratum corneum layer, reaching the epidermis and providing maximum benefits.

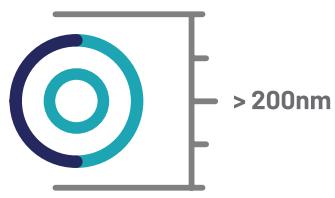

SURFACE CHARGE CONTROL

Capsules surface charge control promotes better fixation when in contact with the surface. Example: in active ingredients for hair products, the capsules have a positive charge which will be attracted by the natural negative charge of the hair.

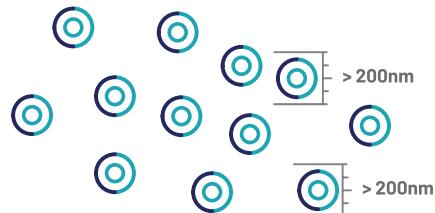

SAFE PARTICLES

We work with labile, biocompatible and biodegradable particles bigger than 200nm (nanometers), which poses no risks to users or the environment.

MONODISPERSITY

We control particle size guaranteeing the uniformity of the active ingredients nanoparticles size and that all of them have adequate permeation for each specific benefit.

MULTIFUNCTIONAL PARTICLES

The capsules main function is to protect the active ingredients and increase their permeation. But, Nanovetores capsules are multifunctional, as they work synergistically with the encapsulated ingredients to increase its benefits.

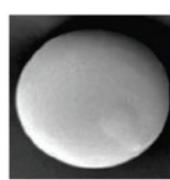

Lipidic particle. Multifunctionality:
Hydration and High Permeation.

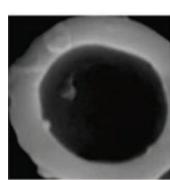

Biopolymeric particle. Multifunctionality:
Skin Firmness and Capillary Adhesion.

MORPHOLOGIC CONTROL

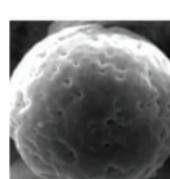

We develop different kinds of particles for different applications.

New Release

NV AGE FREEZE

Freeze in time

Active ingredient

Extract from Sichuan pepper

Benefits

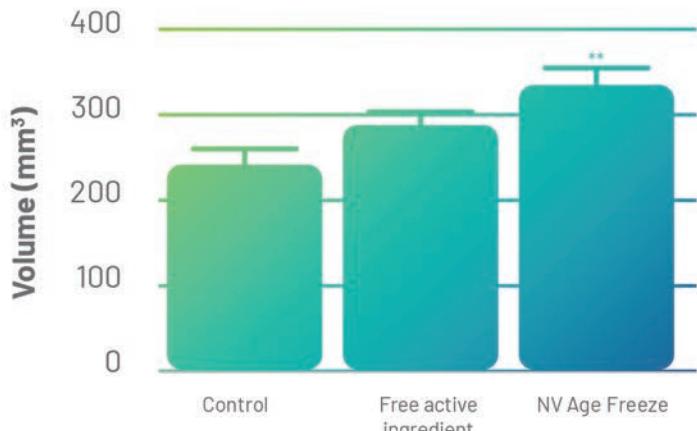

- Antiaging;
- Fine lines reduction;
- Muscular relaxation effect.

Application

- Emulsions in general;
- Gel Creams;
- Creams;
- Serums.

NV Age Freeze contributes to the skin rejuvenation by promoting muscular relaxation and inhibiting nerve-muscle signal transmission in the dermis layer. This effect not only smoothens expression lines and wrinkles, but also improves overall skin texture, offering an innovative approach to skin care.

In Vitro Test: NV Age Freeze sample presented 41.3% and 15.15% higher efficacy when compared to the control group and free active respectively in promoting muscular relaxation.

Graph 1 – Result of collagen gel volume containing contracting cells (**p<0.01);

Figure 1 – Representative images of each group after treatment.

41%

More effective than the control group and
15.15% more effective than the free active
in promoting muscular relaxation.

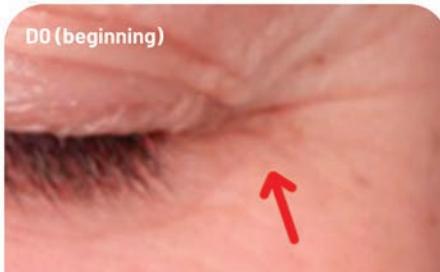

88%

Have noticed improvement in skin
elasticity and lusher skin.

84%

Have noticed their skin more rejuvenated,
fine lines and wrinkles reduction and have
noticed some tensor effect.

Images obtained during the clinic process with
Serum NV Age Freeze 5%

New Release

NV GRAYLESS

Natural hair repigmentation

Active ingredients:

Glycerin, hydrolyzed pea protein, green tea and European larch extracts, glycine, N-Acetyl tyrosine and zinc.

Benefits:

- Natural hair repigmentation;
- Prevents white hair formation;
- Stimulates hair growth.

Applications:

- Emulsions in general;
- Shampoos;
- Serums.

NV Grayless is a nanoparticle system composed by a blend of actives that act in the production of melanin and hair follicle stem cells. The size of the biopolymeric particles, around 300 nm, was carefully selected so that the pigmentation would hit the action target efficiently (Figure 1). This active can be incorporated in cosmetic formulation aiming to reverse the whitening of hair strands and preserve its natural color.

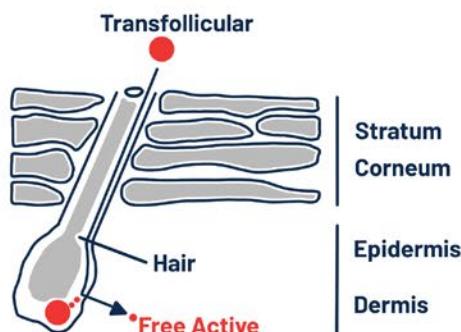

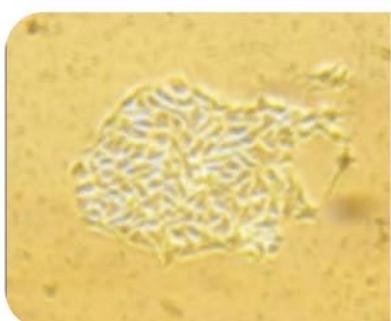

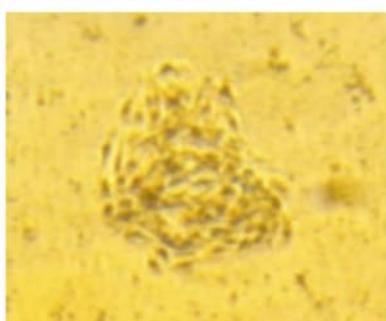

Figure 1: Permeation mechanism of the released active ingredient into the hair bulb. Adapted from DRAGICEVIC and MAIBACH (2015)¹.

Control

Non-encapsulated actives blend

NV Grayless (encapsulated active ingredient)

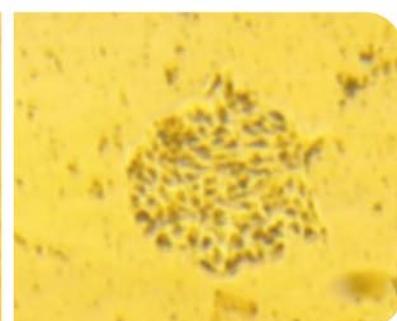

Figure 2: Representative image of the groups indicated with the Fontana-Masson coloration to highlight melanin granules.

91%

Have noticed their gray hair go back to its natural color after using the product.

82%

Have noticed increased hair growth, reduction in white hair formation and hair loss.

Access the QRcode to know more.

Images obtained from Clinical Trials with NV Grayless

In Vitro Study: MELANIN PRODUCTION COMPARISON.

Result: NV Grayless increased in 70% the production of melanin granules, which increases hair strand pigmentation, whereas free actives had 63.2%.

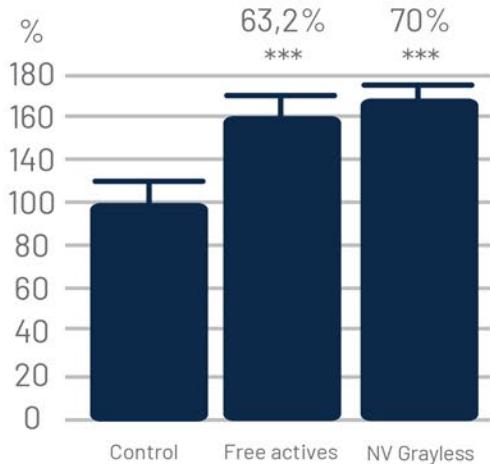

Figure 3: Quantitative graph of the results observed in the study where the control group was normalized to 100% for the respective non-cytotoxic concentrations of the assessed samples (**p<0.001)

New Release

NV CELLU LIGHT

Detox effect in the areas affected by cellulite

Active ingredients

- Asian Centella extract;
- Hera;
- Horsetail plant;
- Ginkgo Biloba;
- Rosemary.

Benefits

- Detox effect in the areas affected by cellulite;
- Lowers cellulitis;
- Stimulates microcirculation;
- Draining effect;
- Helps in anti-inflammatory effects;
- Body measurements reduction;
- Body firmness.

Applications:

- Emulsions in general;
- Serums;
- Lotions;
- Creams.

Cruelty-free

Vegan

88%

Have noticed measurements reduction in application areas.

81%

Have noticed a reduction in swelling in areas affected by cellulite, an improvement in skin texture, and a reduction in sagging.

78%

Have stated that their cellulite was reduced.

NV Cellulight is a blend of consecrated actives encapsulated in biopolymeric capsules that fight cellulite. It possesses draining effect and assists the anti-inflammatory effect, assisting the treatment for gynoid lipodystrophy, for it eliminates the toxins that accumulate between fat cells, reducing the appearance of cellulite providing a measurements reducer effect.

To those who love acids

NV ASCORBIC ACID

Vitamin C in its most active and stable form

Active ingredients

Ascorbic acid.

Benefits

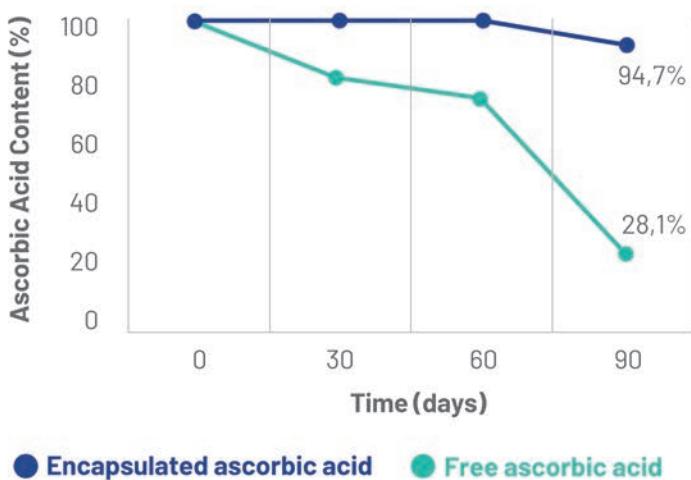

- Stable ascorbic acid for cosmetics formulation;
- Original vitamin C molecule, in its most active form;
- Evens out skin tone;
- Powerful antioxidant;
- Lowers wrinkles and fine lines;
- Improves skin elasticity.

The technology developed by Nanovetores provides better stability against heat and light and protects against vitamin C oxidation in its most active form, ascorbic acid.

Beginning

28 days

Reduction of wrinkles and expression lines

Depigmenting effect

Result of the evaluation for facial wrinkles and expression lines reduction and even skin tone.

NV HYALO COLLA GREEN

**The surprising combination
of hyaluronic acid and vegan
collagen.**

Active ingredients

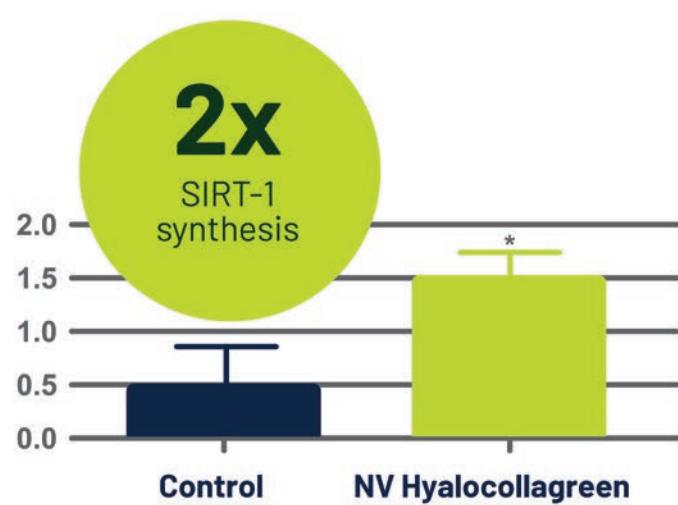

Hyaluronic acid and vegan collagen.

Benefits

- Antiaging effect;
- Facial filling;
- Wrinkle reduction;
- Expression lines reduction;
- Increases collagen synthesis;
- Skin elasticity improvement;
- Antioxidant effect;
- Fights sagging;
- Highlights and restores facial volume in regions such as cheekbone and lip contour.

A success since its release, this active was a winner of the innovation challenge and it is one of the top 10 Nanovetores best sellers. NV Hyalocollagreen it is a high-performance and versatile nanotechnology product, recommended for daily use to obtain natural facial harmonization. The innovation developed by Nanovetores is safe and presents surprising efficacy results.

Expression relative to control

87% Have noticed reduction of eyelid sagging and wrinkles and expression lines filling.

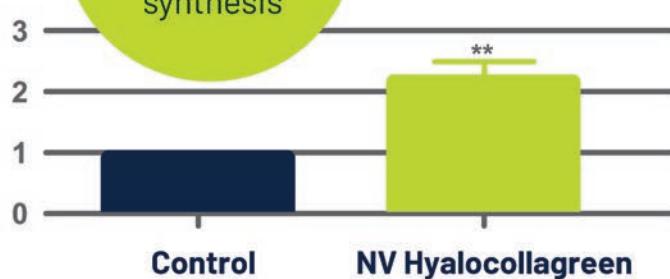

84% Have noticed filling of the nasolabial fold and attenuation of wrinkles and expression lines.

81% Have noticed filling in the perioral wrinkles, skin firmness and skin elasticity improvement.

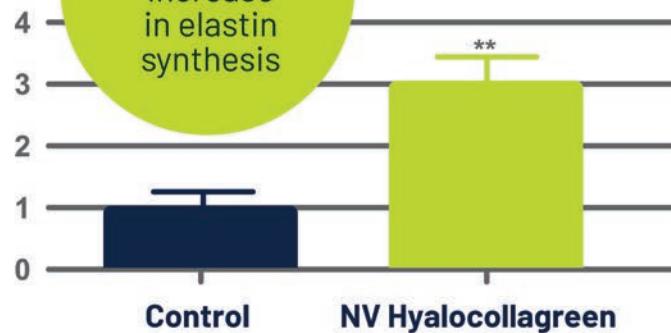

2,5x

increase in collagen synthesis

3x

increase in elastin synthesis

NV RETINOL

Reduces wrinkles
and expression lines

Active ingredient

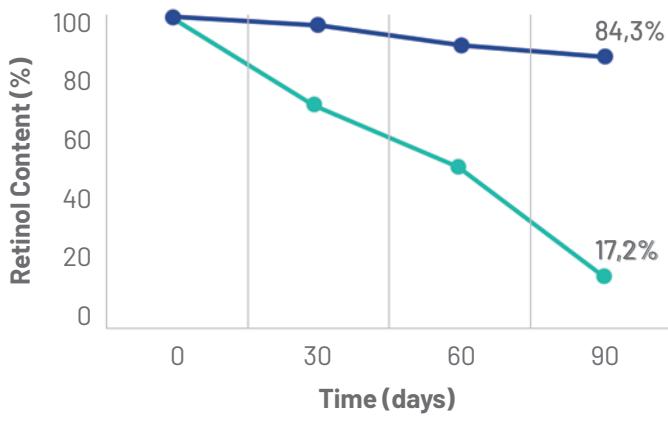

Retinol.

Benefits

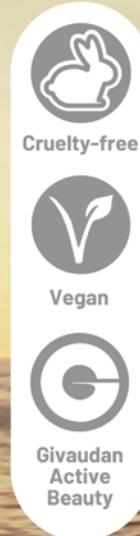

- Antiaging effect;
- Promotes epidermis renovation;
- Evens out skin tone;
- Reduces wrinkles and expression lines;
- Hydration;
- Treats Acne vulgaris.

Retinol is a derivative from vitamin A widely used in skin care. Renowned as one of the most efficient vitamins with antiaging potential, retinol has the ability to stimulate collagen production and normalize skin keratinization, besides providing an antioxidant support that accelerates the rate of cell turnover. Regular use significantly improves skin elasticity and smoothness resulting in a younger, more even, and healthier-looking skin.

Givaudan Active Beauty

NANO JAMBU BP

Description: Brazilian herb rich in spilanthol that generates a local paresthesia effect (tingling) and suffers micro tensions from skin cells made by time and repeated movements, fighting, therefore, aging signs. It also contains antioxidant properties.

Active ingredients: Jambu extract.

NANO SALICYLIC ACID

Description: Nano Salicylic Acid is the ideal active ingredient to fight acne due to its keratolytic and comedolytic effects. It is an agent for superficial peeling, and since it is encapsulated, it is safe for all skin types.

Active ingredients: Salicylic acid.

NANO VETOR Q-10

Description: Increases the effect of coenzyme Q10, which is responsible for energy production, providing energizing effect. It also prevents photoaging, promoting skin rejuvenation, in addition to promote skin elasticity and firmness.

Active ingredients: Coenzyme Q10 (ubiquinone), green tea oil and linseed.

NANO VETOR VITAMINA C

Description: Brightening (even skin tone) and firming (stimulates collagen production) effect, antioxidant, reduces wrinkles and expression lines.

Active ingredients: Ascorbyl palmitate and pomegranate oil.

NV ALPHA ARBUTIN

Description: Powerful depigmenting agent. Acts on melanogenesis, blocking the epidermal biosynthesis of melanin at the application site, safely treating spots, melasma and freckles.

Active ingredients: Alpha-arbutin.

NV ASCORBIC ACID

Description: The original form of Vitamin C in its best version. It promotes even skin tone, hydration, texture and firmness improvement, diminishment of dark spots and also assists in expression lines reduction.

Active ingredients: Ascorbic acid.

COSMOS APPROVED

NV CAFFEINE ECO

Description: Improves skin aspect and firmness, improves microcirculation, has lipolytic action, helps reduce dark circles and protects the skin from photoaging.

Active ingredients: Caffeine.

COSMOS APPROVED

NV CYSTEAMINE 15

Description: Effective in the treatment of hyperpigmentation and melasma. Evens and lightens skin tone.

Active ingredients: Cysteamine.

COSMOS APPROVED

NV DMAE

Description: Tensor with firming effect, anti-wrinkles action, antioxidant, hydrating and antiaging. It contains vegan collagen in its formula.

Active ingredients: Dimethylaminoethanol bitartrate.

COSMOS APPROVED

NV EYELASHES ECO

Description: Helps reduce eyebrow and eyelash loss, promoting hair strength and growth.

Active ingredients: Jaborandi extract.

NV GLYCOLIC ACID

Description: Stimulates cell renovation, reduces fine wrinkles, leaves the skin softer, firmer and rejuvenated. Excellent for acne treatment, actinic keratosis, age spots, dry skin and similars.

Active ingredients: Glycolic acid.

NV GREEN TEA ECO

Description: Nano encapsulated green tea extract presents skin benefits acting on the antiaging process and skin hydration. It has antioxidant and prebiotic effect and stimulates microcirculation.

Active ingredients: Green tea extract.

COSMOS APPROVED

NV HYALOCOLLAGREEN *Award winning at the FCE Cosmetique 2022

Description: Innovative and multifunctional active, promotes wrinkles filling, improves hydration and skin elasticity, reduces sagging and promotes collagen synthesis. Can be applied in anhydrous or aqueous basis.

Active ingredients: Vegan collagen and hyaluronic acid.

COSMOS APPROVED

NV HYALURONIC ACID ECO

Description: Hyaluronic acid can be incorporated in formulations with the purpose of filling wrinkles and hydrating. It also improves skin elasticity, enhances, and restores facial volume.

Active ingredients: Hyaluronic acid.

COSMOS APPROVED

NV HYDROXY ACIDS

Description: Brightening effect, acts as a non-aggressive peeling, helps reduce melasma and promotes cell renewal. It possesses licorice extract which promotes skin redness and hyperpigmentation decrease.

Active ingredients: Glycolic acid, lactic acid and citric acid.

NV MAGNÉSIO

Description: It has anti-inflammatory and antimicrobial action, providing effects such as reducing odors and acne on the skin. Additionally, it promotes hydration, stimulates collagen, reduces skin oiliness and has an astringent effect. NV Magnésio is an active that provides incredible results for the skin. Product applied in facial cream, clinically tested with proven efficacy.

Active ingredients: Magnesium Hydroxide and Magnesium Carbonate.

NV AGE FREEZE

Description: Contributes to skin rejuvenation by promoting muscle relaxation, inhibiting the transmissions of signals between nerves and muscles in the dermal layer.

Active ingredients: Sichuan pepper extract.

NV MANDELIC ACID

Description: Assists in the treatment of photoaging and common acne care, as well as improving skin texture, reducing the appearance of wrinkles and expression lines, and promotes skin renewal and a brightening effect.

Active ingredients: Mandelic acid.

COSMOS APPROVED

NV MELALEUCA ECO

Description: Ideal for anti-acne products. Potent antimicrobial (fungus, yeast, gram-negative bacteria, herpes simplex virus).

Active ingredients: Melaleuca essential oil.

COSMOS APPROVED

NV KOJIC ACID

Description: Lightening and antiaging effect. Indicated for the treatment of skin hyperpigmentation. It contains oat oil and licorice extract.

Active ingredients: Kojic acid.

NV NIACINAMIDE

Description: Promotes skin barrier rejuvenation and cell renovation, prevents photo-aging, protects against blue light, treats for *Acne vulgaris*. It possesses antioxidant properties, evens out skin tone and reduces paleness. It supports atopic dermatitis and rosacea treatment.

Active ingredients: Niacinamide.

NV OIL CONTROL ECO

Description: A blend of actives rich in phenolic acids, potent refreshing substances, and oil regulators with astringent action.

Active ingredients: Essential Oil of rosemary, sage, mint, chamomile, and pumpkin seed oil.

NV PROTECTION ECO

Description: Possesses anti-inflammatory action, protects against UV radiation and assists in skin microcirculation.

Active ingredients: Green tea and soy protein.

NV REDENSIFIER

Description: Redensifies the skin, intensifies cell repair process, antioxidant and anti-inflammatory, adjuvant in UV protection, improves the looks of keloid scars, deep hydration, and more softness, improves elasticity and resistance, natural facial harmonization, nasolabial fold filling, tensor/lifting effect, increases skin volume and density.

Active ingredients: Hydrolyzed pea protein, hyaluronic acid, comfrey and onion extracts.

NV RESVERATROL ECO

Description: Offers prevention and treatment for the skin, acting on the photoaging process. Possesing antioxidant and radioprotector effect, it improves skin elasticity and stimulates collagen production.

Active ingredients: Trans-resveratrol and pomegranate oil.

NV RETINOL

Description: Encapsulated retinol possesses high stability, controlled permeation and prolonged liberation. This active ingredient acts in collagen and elastin synthesis, promoting epidermal renewal and reducing fine wrinkles and aging signs, leaving the skin with a younger and healthier look.

Active ingredients: Retinol.

NV TRANEXAMIC ACID

Description: Powerful brightening effect. It is recommended for melasma treatment and UV induced skin pigmentation prevention.

Active ingredients: Tranexamic acid.

NV UP LIFT *Featured product at In-Cosmetics Brazil 2014

Description: It is a versatile and multifunctional active developed with hyaluronic acid nanoparticles that promote skin firmness and wrinkle filling. It also improves skin elasticity stimulating collagen production.

Active ingredients: Hyaluronic acid, Senegal acacia and Vitamin B5.

NV VITC MAP

Description: Possesses brightening and antioxidant effect, fighting the damages caused by free radicals. Prevents skin aging and stimulates collagen synthesis improving skin firmness and elasticity.

Active ingredients: Magnesium Ascorbyl Phosphate.

SYMBIOPCAPS LA

Description: Beneficial bacteria that harmonizes the skin microbiota resulting in pores minimization and providing hydrating properties, skin pH balance, acne and rosacea treatment, cells metabolism restauration and immunity improvement for a complete and healthy skin treatment.

Active ingredients: *Lactobacillus acidophilus*.

NANO 3C

Description: Acts in cellulite treatment and prevention. Anti-inflammatory, antioxidant and thermogenic action. Accelerates the metabolism promoting fat burn and body measurements reduction.

Active ingredients: Safflower oil, coconut and clove.

NANO ARNICA MONTANA

Description: Improves circulation reducing existing inflammation. Assists in the improvement of muscle sprain and pain, decreases swelling caused by lesions and promotes bruise discoloration.

Active ingredients: Palmarosa and arnica montana essential oils.

NANO BODY LIFT

Description: Firming, hydrating, refreshing and antioxidant action. Promotes lifting and tonifying effect.

Active ingredients: Piperite mint essential oil, palmarosa, green tea oil, coconut extract and soy protein.

NANO SKIN THERAPY

Description: Perfect for skin recovery. Can be applied into post-peeling products, stimulating skin healing. It can also be used for auxiliary psoriasis treatment, eliminating erythematous and scaly lesions which are characteristic of this condition.

Active ingredients: Curcumin, aloe vera and rosehip.

NANOICARIDINA

Description: Safe and powerful repellent that has its effect enhanced by Nanovetores encapsulation system, which amplifies its protection time and strengthens its effects. Safe for all ages. Highly effective against Aedes aegypti, mosquito responsible for transmitting Dengue, Zika and Chikungunya.

Active ingredients: Icaridin.

NV BIOPROTECT

Description: Antimicrobial and antioxidant action, regenerator of the epithelial system. Synergy with NV Nails promotes antiviral effect.

Active ingredients: White thyme, Clove leaf, Cedar Wood Virginia, lavender, lemon grass and melaleuca essential oils.

NV CAFFEINE ECO

Description: Improves skin aspect and firmness, improves microcirculation, possesses lipolytic action, helps reduce dark circles and protects the skin from photoaging.

Active ingredients: Caffeine.

NV CELLULITECH ECO

Description: Acts by burning localized fat, reducing the orange peel aspect. Acts in the treatment of gynoid lipodystrophy and measurements reduction, providing draining, anti-inflammatory and anti-free radicals effect, reducing lipogenesis and increasing lipolysis. It also improves local microcirculation. It possesses high concentration of tocopherol (vitamin E).

Active ingredients: Caffeine, Palmarosa essential oil, Green tea oil and arnica montana oil.

NV DELICATE SKIN ECO

Description: Developed for sensitive skins, it promotes intense hydration and cell regeneration improving skin elasticity. Powerful antioxidant and anti-inflammatory effect.

Active ingredients: Coconut oil, linseed, chamomile and oat.

NV GREEN TEA ECO

Description: Nano encapsulated green tea extract presents skin benefits by acting on the anti-aging process and skin hydration. It has antioxidant and prebiotic action, and stimulation of microcirculation.

Active ingredients: Green tea extract.

NV HYDRATECH

Description: Indicated for the treatment of dry, thin, and sensitive skin. NV Hydratech has the property to maintain the skin naturally hydrated.

Active ingredients: Ammonium lactate and oat oil.

NV ITCHING OFF ECO

Description: It helps alleviate itching and unwanted irritations, it also possesses refreshing and calming effect, helping with the healing process.

Active ingredients: Melaleuca, eucalyptus and piperite mint essential oils.

NV MAGNÉSIO

Description: Has anti-inflammatory and antimicrobial action, providing effects such as reducing odors and acne on the skin. Besides that, it promotes hydration, stimulation of collagen, skin oil reduction and it presents astringent effect. NV Magnésio is an active that provides incredible results for the skin. The product can be applied in deodorant and facial cream, clinically tested with proven efficacy.

Active ingredients: Magnesium Hydroxide and Magnesium Carbonate.

NV NAILS

Description: Natural antifungal that acts against fungi and yeasts. Proven efficacy against *Candida albicans* and *Aspergillus fumigatus*.

In synergy with Nano Bioprotect, it promotes antiviral action.

Active ingredients: Melaleuca and lavender essential oils and cinnamon and clove oils.

NV RELIEF ECO

Description: Acts on the immediate relief of muscle pain, arthritis and rheumatism. It promotes skin regeneration and strengthens tissues, improving blood microcirculation, expanding toning in the treated region.

Active ingredients: Vetiver essential oil, sweet birch essential oils and Murumuru butter.

NV ROSE HIPS ECO

Description: Helps in skin regeneration, post-surgery scars and burns. Ideal product for skin renovation, stimulates skin tissue regeneration helping to prevent and mitigate skin premature aging. Excellent effect in preventing stretch marks. Possesses tocopherol, commonly known as vitamin E.

Active ingredients: Rosehip oil and vitamin E.

NV CELLULIGHT

Description: Acts through draining effect, decreasing the swelling caused by cellulite inflammation. It also stimulates local microcirculation, possesses healing effect and promotes skin firmness and reduces measurements. Indicated for the treatment of gynoid lipodystrophy.

Active ingredients: Asian Centella, heba, horsetail plant, rosemary and gingko biloba extract.

NV SKIN HEALTHIER ECO

Description: Acts as a regenerator of damaged skin, with anti-inflammatory action and helps minimize the appearance of scars.

Active ingredients: Aloe vera extract, chamomile, and onion.

PRESERVATIVE FREE

Cosmos Approved

NV LISS

Description: Versatile and multifunctional active. Hair anti-aging with protective action that increases hair mass. It promotes disciplinary effect, color protection and hair styling.

Active ingredients: Onion extract, urea and glycerin.

NV ARGAN

Description: Hydrating, softening, volume and frizz reduction properties, and also protects from hair breakage and dryness, leaving it more beautiful and healthier.

Active ingredients: Argan oil.

NV GLOSSY

Description: Provides intense glow and high hair substantiality, providing high hydration and higher elasticity and softness to the strand.

Active ingredients: Chamomile oil, avocado, sunflower and green tea extracts.

NV GRAYLESS

Description: It acts on the hair follicle, stimulating stem cells to repigment the hair strand, and also protects the follicle from oxidation and activates melanogenesis to increase melanin production.

Active ingredients: Glycerin, hydrolyzed pea protein, European larch and green tea extracts, glycine, N-Acetyl Tyrosine and zinc.

NV GREEN TEA ECO

Description: Nanoencapsulated green tea extract presents hair benefits, acting as an astringent, promoting cleansing and balance for oily hair.

Active ingredients: Green tea extract.

NV HYALOCOLLAGREEN

Description: Innovative and multifunctional active, acts as a filler on the hair fiber, prevents the cuticle from opening and reduces breakage, providing strength and restructuring to the hair.

Active ingredients: Vegan collagen and hyaluronic acid.

NV HYALURONIC ACID ECO

Description: Hyaluronic acid can be incorporated into formulations for chemically treated hair, where it reduces porosity, makes the hair strands shinier, more hydrated, and improves hair elasticity.

Active ingredients: Hyaluronic acid.

NV OIL CONTROL ECO

Description: Blend rich in natural oil regulators. Provides oil control without drying out the scalp. And it also helps in the treatment of dandruff and hair breakage.

Active ingredients: Rosemary essential oil, sage, mint, chamomile and pumpkin seed oil.

NV REDENSIFIER

Description: A versatile and multifunctional active ingredient. It restructures porous hair strands, nourishes, repairs and strengthens. It helps in the treatment of Alopecia areata, realigns the hair strands, and controls frizz. Promotes an increase in hair mass, volume and color protection, as well deep hydration and softness. It also improves elasticity, provides strength, shine, resistance and protects the hair strand.

Active ingredients: Hydrolyzed pea protein, hyaluronic acid, comfrey and onion extracts.

NV R-GROWTH HAIR

Description: Group of active ingredients that act in the anti-hair fall effect, growth and hair thickening, providing vitality and vigor to the strands. The product reverts alopecia (imbalance between hair growth and loss) rapidly reactivating hair growth and decreasing hair loss.

Active ingredients: Glycerin, glycine, green tea extract.

NV SMOOTH

Description: Acts in frizz reduction and provides high substantiality to the strand. When thermoactivated, cuticle sealing promotes strand shielding effect, favoring hydration, softness, alignment and glow provided by the product.

Active ingredients: Hydrolyzed soy protein, cress and coconut extracts.

FOR THOSE WHO HAVE NO TIME TO WASTE

Nanovetores has a portfolio of products ready for bottling that matches versatile and pleasant bases developed to perfectly complement our active ingredients. We are capable to offer complete solutions for brands and clients with quality and agility, acting as partners with the highest standards of R&D and Quality Control.

CREAM WITH NV ASCORBIC ACID

Appearance: Product with high viscosity and white to cream color.

Description: Vitamin C in its most active original form. The cream with NV Ascorbic Acid contains the encapsulated active ensuring better stability to heat, light and protection against vitamin C oxidation. Providing benefits such as evening out skin tone, dark spots fading, better hydration, texture and firmness, also helping reduce fine lines. Clinical trials proved the efficacy of the product in providing reduction of wrinkles, fine lines, and evening out skin tone. Dermatologically tested.

Active ingredients: NV Ascorbic Acid (10%).

CREAM WITH NV DMAE + NV UP LIFT

Appearance: Product with high viscosity and white color.

Description: Product developed for intensive wrinkle treatment. Clinical trials have shown smoother facial and neck wrinkles in just 7 days of use. The encapsulated ingredients (NV Up Lift and NV DMAE) act synergistically in treating wrinkles, guaranteeing visible fast and safe results. Dermatologically tested.

Active ingredients: NV Up Lift (15%) and NV DMAE (15%).

CREAM WITH NANOVETOR VITAMINA C

Appearance: Product with medium viscosity and white color.

Description: Product for facial care with superior antioxidant properties. The encapsulated vitamin C does not oxidize and, therefore, delivers its properties with maximum efficacy. The formulated cream has a pleasant application and ensures skin hydration. Dermatologically tested.

Active ingredients: Nanovetor Vitamina C (10%)

DEODORANT WITH NV MAGNÉSIO

Appearance: Milky liquid with white to cream color and characteristic odor.

Description: The deodorant with NV Magnésio is safe and natural in substitution to aluminum. Its efficacy is proved by tests, guaranteeing 24 hours of deodorant effect. It also presents antibacterial and sweat anti-odor effect. Provides calming effect, promotes pH equilibrium and control, and evens out skin tone.

Active ingredients: NV Magnésio (10%).

NAIL STRENGTHENER

Appearance: Milky liquid with white to cream color and characteristic odor.

Description: The Nail Strengthener is an excellent solution for nails with fungus and spots. Strengthens, repairs and revitalizes promoting healthier growth, in addition to aiding in the healing process, prevents infections and hydrates nails and cuticles.

Active ingredients: NV Nails (10%).

GEL CREAM WITH NV RELIEF ECO

Appearance: Product with medium viscosity with white to cream color.

Description: It is indicated as an adjuvant in the topical treatment of muscle pain, bruises, torticollis, neuralgia and rheumatic pain, as well as post-sun and light burns treatment formulations. Clinical trials have shown that the product relieves pain to 100% of the participants 1 hour after the application, and it also provided comfort sensation due to the decrease in tiredness and pain feelings through vascular alterations.

Active ingredients: NV Relief ECO(10%).

GEL NV EYELASHES ECO

Appearance: Product with high viscosity with yellow to amber color.

Description: Acts synergistically in the hair follicle and strands, providing growth and regeneration in a healthy way. The product guarantees eyelashes and eyebrows growth, strands health maintenance and skin hydration. Clinical trials prove the product's efficacy in growth, increasing volume and strengthening of eyebrows and eyelashes strands in 28 days. Dermatologically and ophthalmologist tested.

Active ingredients: NV Eyelashes ECO(10%).

INSTANT ARGAN

Appearance: Slightly cloudy and viscous, liquid with yellow to amber color.

Description: Instant Argan contains argan oil in a ludic and versatile formulation. The product delivers softness to strands, frizz and hair volume reduction, and it also promotes hair protection and hydration with the best of nanotechnology.

Active ingredients: NV Argan IF(2%).

INSTANT GLOSSY

Appearance: Slightly cloudy and viscous, liquid with yellow to amber color.

Description: Instant Glossy was developed with the purpose of providing hair an instant shine, elasticity, hydration, and softness. With a blend of nanoencapsulated natural oils, the product reaches high compatibility when interacting with hair strands, presenting high efficacy.

Active ingredients: NV Glossy IF(2%).

INSTANT HYALOCOLLAGREEN

Appearance: Product with medium viscosity with white to cream color.

Description: Instant Hyalocollagreen presents innovative ingredients that act synergistically as antioxidants and promoters of increased collagen synthesis, allowing restauration, strengthening and hydration of hair strands.

Active ingredients: NV Hyalocollagreen ECO(2%).

INSTANT SMOOTH

Appearance: Product with medium viscosity with white to cream color.

Description: Instant Smooth was developed to act bringing instant softness and alignment to hair strands through its hydrating and frizz reduction effect. With a versatile formulation, the product presents itself in a ludic way and delivers high efficacy in hair treatment.

Active ingredients: NV Smooth IF(2%).

NV CELLULITECH ECO LOTION

Appearance: Product with low viscosity and white color.

Description: Highly effective anti-cellulite lotion. Acts with a powerfull anti-inflammatory action, providing better appearance to the skin since its first application and also as a long-term treatment. Dermatologically tested.

Active ingredients: NV Cellulitech ECO(10%).

NV TRANEXAMIC ACID LOTION

Appearance: Product with medium viscosity and white to cream color.

Description: Acts significantly in skin lightening. It is recommended for melasma treatment and prevention of UV-induced skin pigmentation.

Active ingredients: NV Tranexamic Acid(5%).

NANO AGELESS ULTRA

Appearance: Product with medium viscosity and chocolate brown hue, developed to be compatible with all skin colors.

Description: Product for the eyes area that instantly softens wrinkles, fine lines and under eye-bags, providing a more youthful aspect. Even though it promotes an immediate and temporary effect, Nano Ageless Ultra offers long term benefits due to the presence of high performance antiaging active ingredients in its formula.

Active ingredients: NV Hyaluronic Acid(5%) and NV Age Freeze(2%).

NANOICARIDINA IN BUFNE

Appearance: Milky suspension with white to cream color.

Description: Safe and efficient repellent enhanced by Nano-vetores encapsulation system, providing a prolonged protection time of up to 8 hours. Presents high efficacy against Aedes aegypti, mosquito responsible for transmitting the virus that causes dengue, zika and chikungunya.

Active ingredients: Nanoicardin PF(25%) and Silk Gel(2%).

ANTI-STRETCH MARKS SERUM

Appearance: Product with medium viscosity and white to cream color.

Description: The serum is an excellent skin regenerator, and it is indicated for preventing and treating stretch marks. Acts as a regenerator for damaged skin, anti-inflammatory and helps minimize the appearance of scars.

Active ingredients: NV Rosehip ECO (5%), NV Tranexamic Acid (3%) and NV Skin Healthier(3%).

HAIR BOOSTER SERUM

Appearance: Transparent to lightly yellow liquid product.

Description: Hair Booster Serum is a combination of active ingredients that works on the anti-hair loss effect, growth and hair thickening bringing vitality and vigor to the strands. The product inverts alopecia(imbalance between hair growth and loss) rapidly reactivating hair growth and decreasing hair loss, with clinically visible results in 30 days. Dermatologically tested.

Active ingredients: NV Caffeine ECO (2.5%), NV Eyelashes ECO (5%) and NV R-Growth hair(5%).

NV CYSTEAMINE SERUM

Appearance: Product with low viscosity and white to lightly yellow color.

Description: The Facial serum with NV Cysteamine 15 is a product with high permeation that inhibits essential melanogenic enzymes, reducing melanin production and generating a powerful antioxidant effect, promoting skin brightening.

Active ingredients: NV Cysteamine 15(10%).

NV DMAE SERUM

Appearance: Viscous liquid product, colorless to slightly yellowish.
Description: It is an antiaging serum with strong anti-inflammatory, antioxidant, and hydrating action. It acts on wrinkles reduction and promotes an increase in skin firmness, improves overall skin appearance. It is responsible for the immediate and long-term tightening effect.

Active ingredients: NV DMAE (10%).

NV HYALOCOLLAGREEN SERUM

Appearance: Viscous liquid product, colorless to slightly yellowish.
Description: Facial serum with antiaging and facial filling action. It acts on reducing wrinkles and expression lines, it increases collagen synthesis and improves skin elasticity. It also has antioxidant effect combating flaccidity. Enhances and restores facial volume and areas such as the cheekbone and lip contour, leaving the skin firmer. In vitro trials prove the product's collagen, elastin and sirtuin production.

Active ingredients: NV Hyalocollagreen(5%).

NV NIACINAMIDE SERUM

Appearance: Viscous liquid product, colorless to slightly yellowish.
Description: The facial serum with NV Niacinamide is indicated for people with sensitive skin. It is responsible for skin barrier regeneration, cell renovation, photo aging prevention, protection against blue light, *Acne vulgaris* treatment and has antioxidant properties.
